The Basics

Simply include the jsPDF library in your `<head>`, generate your PDF using the *many* built-in functions, then hook up a button to trigger the download. All the examples here use jQuery.

Browser Compatibility

jsPDF will work in IE6+*, Firefox 3+, Chrome, Safari 3+, Opera. For IE9 and below, we lazily load a Flash shim called Downloadify which enables the files to be downloaded.

* Current build does not have IE6-9 shim enabled

NB: UTF-8 is *not* supported by default, however there might be some plugins allowing you to use it, such as *addHTML*
